

Engineering Services Private Engineering Training

Private Engineering Training is a fixed-price Engineering Services program that provides you with face-to-face tutoring on your own Data Acquisition System (DAS).

Training by Our Experts Offers:

- **An Improved Understanding of Your System** - Work with an Engineer to understand how your StackVision™ server or 8864 Data Controllers are configured. Edit and improve your system, while learning best practices.
- **Configuration Changes with Confidence** - Our Engineer will review proposed changes before the training session, then work with you on a prioritized list.
- **Roadmap for Next Steps** - If there is more than can be accomplished in the time allotted, the Engineer will provide a document outlining next steps. Remaining configuration tasks can be booked as normal engineering hours via proposal. Cases will be created for tasks you can complete with assistance from our Support team.

Engineering Training Process

Discovery

Kickoff meeting to develop a prioritized itinerary

Training

In-person (Austin or on-site) or Virtual Training

Documentation

Includes items on the list plus any proposal or case creation as follow-up to training
