

Engineering Services Private Engineering Training

Private Engineering Training is a fixed-price Engineering Services program that provides you with face-to-face tutoring on your own Data Acquisition System (DAS) server.

Training by Our Experts Offers:

- **An Improved Understanding of Your System** - Work with an Engineer to understand how your StackVision™ server or 8864 Data Controllers are configured. Work with them to edit and improve your system, while you ask questions and learn best practices.
- **Make Configuration Changes with Confidence** - Our Engineer will review proposed changes before the training session, then work with you on a prioritized list.
- **Roadmap for Next Steps** - If there is more than can be accomplished in the time allotted, the Engineer will provide a document outlining next steps. Remaining configuration tasks can be booked as normal engineering hours via proposal. Cases will be created for tasks you can complete with support from our customer service team.

Engineering Training Process:

- **Discovery** - Kickoff meeting via phone and screen share to develop a prioritized itinerary
- **Training** -
 - ♦ Austin - 4-hour minimum, recommended 1 day
 - ♦ Onsite - 1-day minimum, plus mobilization fee
 - ♦ Limits: 3 attendees, one StackVision server
- **Documentation** - Itemized list plus any proposal or case creation as follow-up to the training period
