Server Migration QA

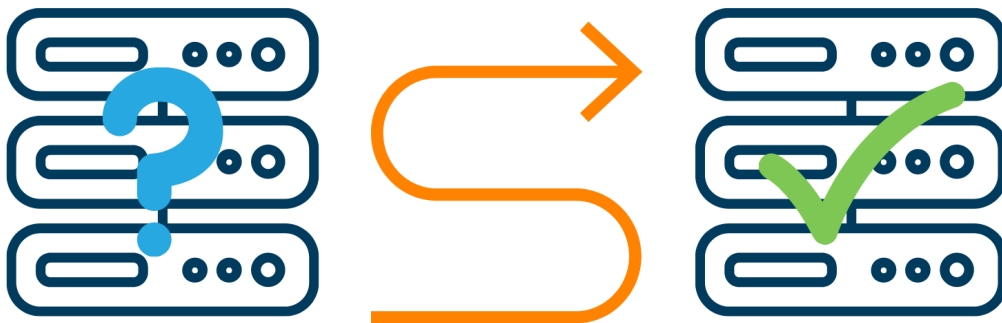

Even a robust and reliable ESC Spectrum StackVision™ Data Acquisition System (DAS) server eventually requires hardware and software replacement. Upgrading and migrating to a new server is a technical high-wire act and requires careful calibration and a deep understanding of your systems.

ESC Spectrum's Engineering Services team can help you through this process. We will ensure that you go through all the steps needed to migrate successfully and that StackVision is up and running successfully.

We Help Ensure a Successful Migration

Performing a server migration in-house is not an easy feat. With so many steps involved, it's easy to miss one. With our Server Migration QA process, our seasoned Engineering Team will assist you to make sure your facility is migrated efficiently and effectively.

Server Migration QA

This one-time Server Migration QA involves the following steps:

- ✓ Verify Operating System
- ✓ Verify Microsoft® SQL Software
- ✓ Analyze index fragmentation and provide recommendations as needed
- ✓ Manage SQL Server log history
- ✓ Check database integrity
- ✓ Verify communications to data controllers
- ✓ Verify gap data was addressed during cutover
- ✓ Verify scheduled tasks
- ✓ Verify any batch files referenced in configuration are copied over and located in the correct folders.
- ✓ Verify e-mail functionality is setup as before
- ✓ Verify linked reports

Note: Purchase of the new hardware and platform licenses is the customer's responsibility. ESC Spectrum software licenses and configuration are the customer's responsibility. A DASProtect contract is required. Server Migration QA is a fixed-price remote engineering engagement.
